* - further parts are required depending on wear or recommendations in the maintenance schedule								

We reserve our right to change this spec without notice.

* please specify in your order the working pressure of compressor!

** Oil thermovalve insert is 70°C as standard, on demand 55°C and 83°C available.

*** please inform us ever about the serial number of the compressor.

**** the article number can be different dependent on the air end type.

The stated prices are net, ex works GÜGLINGEN, without duties and taxes.

Attention:
Please specify in your order the working pressure of compressor and the machine number!

The compressor oil should be changed at latest after 2.000 working hours or once a year.
Recommended compressor oil type – RENNER R68 (as standard) or RENNER R46
The exchange of specific parts can be required earlier depending on installation-, application- and working conditions.
Regularly maintenance according to our maintenance schedule and using of original RENNER spare parts ensure the indicated life time of the compressor and are the basis of RENNER warranty directives.
Please find further information in our operation manual and spare parts list as well as their instructions.
